

# Mobile App Development Supervisor (20-40%)

*Are you currently studying Computer Sciences or did you recently graduate in a related subject? Are you located in Switzerland and looking for an interesting opportunity to gain practical experience on the job? Do flexible working hours and dynamic processes matter to you? We, a professional team of three motivated, sociable and open-minded people with backgrounds in Business Administration, Finance and Quantitative Economics are looking for you:*

***A developer to support and supervise the programming of our mobile app in collaboration with a production agency as of February/March 2018.***

*We offer you to exercise your skills and abilities, to expand your knowledge, and to work on and influence the development of an app establishing:*

***A digital marketplace offering peer-to-peer services in the fashion sector.***

*We are offering a chance to gain practical experience under real-live conditions, an to-be-discussed hourly financial reward and a fair option for future participation and co-operation in case of your delivery meeting our expectations during the next three to six months of the app development phase, because:*

***We are looking for a CTO (100%) to lead the technical aspects of our business as of June 2018.***

*Our team shares a vision, is goal-driven, analytically-oriented, and well-structured. We appreciate teamwork and the willingness to take on responsibility and ownership. Team members benefit from our entrepreneurial management style and our flat organizational structure which allows for creative initiatives, out-of-the-box solutions and flexibility with regards to working place and time.*
