Software Engineer – TOWER 360

About the company:
TOWER360 is a cloud and mobile asset and leasing management platform catering to the needs of Commercial Real Estate Owners, Funds, Investors and Brokers. We are an early stage but fast growing technology company developing cloud based, cutting edge data driven platform that will change the face of global commercial real estate, which includes Offices, Retail, Shopping, Warehouses and Gastronomy. The product, currently in beta stage, is being tested with larges European commercial real estate players (including real estate asset managers, funds and brokers).

Opportunity for you:
We are currently looking for talented people in the areas of engineering, software development, sales, and technical marketing to expand our team based out of our global headquarters in Hamburg.

Position: FULL STACK DEVELOPER(S)
We are currently looking for 2-3 Full stack developers to join our technical team based in Hamburg, Germany.
- Responsibilities o   Ideally between 3 and 5 years of work experience in leading full stack development at leading companies or high growth startups.

- The ideal candidate will have built and run applications in a cloud environment
- The candidate should take responsibility and ownership of their own work
- The ability to thrive in a fast paced, agile startup environment
- The ideal candidate has a passion for user experience, a meticulous attention to detail and believes that building a beautiful product starts on the inside.
- Relevant software development experience: REST API design, ASP.net, Javascript, Angular JS
- Candidates must have an ability to work required hours

As an Engineer at Tower360, you will be working on all ends of the product, whether it is debugging, architecting the next new feature, or tweaking background jobs. You will be working alongside the best engineers who have worked for clients like Blackstone, SpaceX, Morgan Stanley, Siemens and others. We are looking for an experienced full stack developer with solid ASP.net and JavaScript experience to join the team and help expand our product modules.
