

Carcodex is a digital car platform that uses cutting-edge technology to empower the customer with smart decision making.

Unlike traditional car marketplaces, our tailored customer experience and integrated offers help new car buyers by increasing comfort and efficiency in the purchasing process.

Full Stack Developer (60% - 100%)

We are looking for a passionate and talented full stack developer to help us building the next generation car marketplace.

On a normal day, you would work on the following tasks and technologies:

- Implement new amazing features using the **AngularJS** framework
- Add new API endpoints to the **Node.js** backend
- Make sure that everything is properly stored in the **MongoDB** database and that the queries to **Elasticsearch** as well as the **MySQL** database are reasonably performant
- Brainstorm on possible technical implementations of certain features
- Start building an admin backend based on **React** or **Angular**

The following qualities are a must:

- Eager to work in a young and dynamic team with a lot of freedom
- Passionate about coding and technology in general
- Dreams in JavaScript and is proficient in web technologies
- Very good knowledge in AngularJS and Node.js
- Speaks very good English

Having the following qualities helps but is not strictly necessary:

- Based in Zürich, Switzerland
- Worked with Elasticsearch, MySQL and MongoDB
- Experience in DevOps, server management and setting up continuous deployment
- Has a basic understanding of Machine Learning techniques

Carcodex believes in rewarding success and working with outstanding people. We are seeking individuals that can make the difference. We are offering a competitive package, including the chance for company equity and a long-term career opportunity in a fast growing company.

Are you the perfect match for this vacancy? If so, please send your letter of application and a complete dossier to: be-part-of-us@carcodex.com
