easy cash, everywhere

We are a young & dynamic team of experts with a global vision: withdrawing cash should be easy and quick – no matter where you are: at home, on the run or in your holidays – but just one click away.

Looking for an ATM is not very interesting – it is a machine. Withdrawing cash at the kiosk while buying your chewing gums and talking to a real person is just better. We are about to implement our system into various shops & services in order to make cash withdrawal as easy as a few clicks on your smartphone, No matter if you're in a Bar in Zurich, on a Shopping tour in Rio de Janeiro or at the Beach of Bali.

SONECT is a mobile app. We provide a cash distribution platform, that enables every shop to act as an ATM for you.

We are looking for a strong profile that leads the IT side of SONECT to the next level

Head of IT   100%

After our successful launch of the SONECT cash withdrawal app for iOS and Android we are now looking for super powers to grow the entire platform. A hands-on leader will orchestrate the on-going development efforts and get us ready for rapid growth and expansion. The candidate will be required to work closely with existing developers (including remote teams) and oversee the general developments, integration, testing and roll-out. He/she needs to develop and manage the product roadmap while working closely with the executive management of the company. Our start-up provides unique opportunities for someone who is willing to take responsibilities and can deliver at quality and on time. Providing financial services in production requires an extra level of diligence and love for getting things right.

You are experienced in:

- building RESTful services in Node.js
- secure, scalable high-performance Node.js applications in production
- cyber security and best practices
- Agile development methods
- git branching models for feature and release management
- non-relational databases like MongoDB
- Linux shell scripting and familiarity with Ubuntu
- cloud computing platforms, like Amazon Web Services or Digital Ocean

Additional relevant qualifications:

- frontend / mobile developer skills (ideally native iOS / Android)
- blockchain / smart-contract development in Solidity on Ethereum-style blockchains (Ethereum or monax (formerly eris-db) by Monax)
- build automation tools like Ant, Maven, Gradle, or Gulp.js
- built 'deployment pipelines' using tools like Jenkins or TravisCI
- proficient with test automation frameworks like Mocha or Jasmine

What we offer:

- A fast-paced working environment in a rapidly developing company
- Challenges which let you grow day by day
- Flat hierarchies with space for your own ideas in a dynamic environment
- Office space 5 min walking distance from Zurich main station
- Competitive salary for start-ups and equity package

Please contact hr (at) sonect.ch if this sounds interesting or you have further questions or remarks. We do not need to see your high school degree but please tell us:

(these points are required to be considered for an application to be considered):

- why you want to take this opportunity
- what production system you have already built
- the worst security breach that you have seen to date
- what code you are able to build while blindfolded
