# WE ARE HIRING!
## Machine Learning Engineer
"""

def hire(candidate):
    # Eager to dive into the Startup world?
    if candidate.startup_ready is True:
        # Machine Learning Pro?
        if candidate.ml_pro is True:
            if candidate.python_experience_years > 3:
                print("You should talk to us!")
                """

                # Data Scientist / Machine Learning Engineer
                (Python, tensorflow, keras, sklearn, django, graphql)
                Location: Zurich Downtown (3-4 min from Zurich Train Station - literally!)

                We are looking for a Machine Learning Engineer to join our journey to revolutionize
                the Digital Marketing field with a modern AI/ML Platform. You should be a strongly
                analytic person, as well as being passionate about top-notch frameworks and
                technologies in the market.

                Join us and work closely in our young startup - including early-startup benefits such
                as an interesting equity model. To help to build a platform which changes
                the way Marketing is done today.

                ## Responsibilities
                - Develop state-of-the-art machine learning models for our platform
                  - Focus on Time-Series (Prediction, Anomaly Detection & Prescription)
                  - Development of our core platform
                    (python, django, graphql, tensorflow, sklearn ++)
                - Take responsibility of components and product decisions
                - Help writing nice job-profiles for new team members - we're growing ;)

                ## Requirements
                - BS/MS degree in data science/statistics
                - Experience tensorflow/keras/sklearn on real-world implementations
                - Experience in Python Development
                - Excellent problem solving and analytical skills

                ## Our Offering:
                - Opportunity to solve difficult problems that have an immediate and
                  valuable impact for Marketing Teams world-wide
                - Become part of the team in a young startup, to make the
                  real difference with your ideas & shape the future organization
                - Active coaching & education from our highly qualified founding-team
                - Interesting dynamic-equity model & free coffee ;)
                """
