

Internship in Technology & Innovation of Insurtech

Work start: as soon as possible; duration 3-6 months

About the company

TONI is an insurtech startup, that offers a fully digital insurance offering as a white-label solution. Our slogan “Make insurance simple” underlines our approach to focus on today’s customer requirements by offering a fully digitized and automated insurance solution. Our white-label approach allows us to leverage the brand of large established institutions and to quickly gain access to a large amount of private clients as well as to be able to offer insurance solutions inside unique eco-systems. TONI is based at Bellevue in Zurich.

About the role

During your internship, you will take on the role of a junior product manager / technical specification engineer to help us to establish innovative, customer-oriented and highly automated processes. This is essential for us to achieve cost leadership through automation as well as fulfilling today’s customer expectation of being able to manage one’s insurance products in a fully automated way.

As a junior product manager technical specification engineer you are playing a leading role within our company. You will be working directly in the Technology & Innovation department and will hence directly be exposed to the management of a large IT project in a leading Swiss insurtech. Further, you are given the opportunity to prove and expand your analytic & technical prowess, as well as the opportunity to have a direct impact on defining our insurance product and have a market impact. Furthermore, you are also given the opportunity to do various coding assignments as well as to support in quality assurance of our solution.

You should apply if you:

- Are excited to work in a leading Swiss insurtech and want to have a real impact in changing the way the insurance market works
- Are excited to help TONI to become leader in process-automation (thus achieving cost leadership) on basis of innovative technical processes
- Have a strong interest in technology & fintech / insurtech space
- Enjoy tackling complex problems and conceive “simple” approaches to solve them (e.g. technology processes, automated decisions), so that we can keep our product simple
- Are a highly motivated person that is willing to put in the extra mile to get the best result

The following experience is valued:

- Strong analytic thinking
- Ability to manage complexity
- Strong technical / IT understanding
- Coding experience (e.g. Python / Matlab)
- Understanding of insurance processes
- You have high attention to detail and won’t compromise on precise and thought-through processes to solve problems in a simple and effective manner
- Ability to work within tight deadlines, adjust to changes in priorities
- Comfortable in a fast moving, fluid environment.

Application / Contact

Please send your application including CV to Alexander Sanders (sanders@toni-dis.ch).
