Software Engineer – 100% position in Zurich

We seek a talented individual to join Catalyst immediately.

Catalyst implements **application networks for the most innovative impact ventures** in frontier markets. Through its work, Catalyst enables fast growing businesses which provide essential products and services to consumers in Africa and Asia.

We leverage APIs and microservices to help our customers get to market in an agile way and we are growing fast. We are helping our customers to secure their data and maximize its value.

Marry work, profit and meaning

This position is an opportunity for the most talented software engineers to have an impact on development in emerging markets while making money and contribute to building a company. We offer an attractive package including equity. We are an inclusive, nice, honest and very ambitious team. We care. We have fun. We are an exciting place to work in the heart of Zurich.

We seek engineers with experience in

- *Java 8 SE, JVM and Spring framework*
- *Design patterns*
- *Modern software architectures*

We value and expect

- *Clean and testable code*
- *Openness and teamwork*
- *Knowledge sharing*
- *Interest and ability to learn other coding languages as needed*

You will

- Work together with clients to transform their requirements into digital infrastructure
- Implement, configure and connect existing applications using APIs
- Actively participate in the development of Catalyst
