EXPENSE ROBOT

Software Engineer in fast growing **Fintech Startup** in Zurich

Ready to be part of Expense Robot's Tech Force?

Expense Robot is a Fintech startup with the mission to automate all Finance operations tasks by leveraging Artificial Intelligence. After a successful prototyping- and testing phase of our initial cloud-based expense management service, we went live with a first wave of customers in September.

As a Software Engineer, you get the opportunity to work closely with our CTO (ETH & CERN alumni) and take responsibility for
   - delivering new features (incl. planning, development, and testing)
   - advancing technology to prepare for global scale
   - ensuring reliability and performance of the platform

We are a well-balanced team of 8 experienced technology- and business experts and have our office in the center of Zurich. If you are a pragmatic and hands-on person with 4+ years of relevant work experience, who wants to make an impact, then this is your chance.

Contact us at recruiting@expense-robot.com. We look forward to getting to know you!
