

VIABZ is a growing health-tech startup and has been a competent partner for corporate health over the last 3 years. Our mission is to bring an active and healthy lifestyle into swiss offices. Therefore, we support our corporate customers in planning and realization of health-related services to their employees.

To take the next step and grow our service into a digital platform our team is looking for a:

## **Co-Founder with experience in Web development and UX**

### **Your main tasks will include**

- Co-create VIABZ' digital strategy in close collaboration with the founder
- Development of a web platform for our users to interact daily
- Development of websites and landing pages
- Conducting A/B tests to increase subscriptions and leads, and decrease churn
- Collaborate with VIABZ' marketing team

### **The skills you will add to our team**

- 2+ years experience in web development
- Skilled in frontend programming languages (Javascript, CSS, HTML)
- Excellent communication skills
- Experience with A/B testing on Google Optimize is a plus
- Experience with Google analytics is a plus
- Experience with CRM tools such as Mailchimp is a plus

### **You fit to our team if**

- You have a positive attitude and a lot of energy
- You are a self-starter and can work independently
- You like new challenges and are a creative mind
- You are passionate about sports and an active lifestyle

## What we can offer

- A base salary and a co-founder position
- A young, cool and dynamic team with a vision
- A great office in the center of Zurich
- Flexible and remote work

## Interested?
